

Patient Name: John Doe

Age: 52

Date: 2025-11-01

Diagnosis: Type 2 Diabetes Mellitus, Elevated Lipids

Prescription:

1. Metformin 500mg – twice daily
2. Atorvastatin 10mg – once daily (night)

Notes: Patient reports mild chest discomfort during exertion. Recommend evaluation of blood pressure, lipid profile, and HbA1c. Consider referral to Cardiology if symptoms persist.
